2009

What you'll find in this toolkit:

General Information

Introduction..... 4
PDSA Cycle..... 9
Immunizations Quality
Assessment & Performance
Improvement Plan
Development 10
Sample: Vaccination CQI
Action Plan..... 13

Data Tools

Immunization Data Collection
Tool 15
Immunization Monthly
Intervention Tracking Tool 17
Immunization Data Collection
Worksheet – Influenza..... 19
Immunization Data Collection
Worksheet – Pneumovax 20
Immunization Data Collection
Worksheet – Hepatitis B..... 21
Immunization Data Collection
Worksheet – Patient Record.. 22

Vaccination Toolkit

Developed by the Forum of ESRD Networks'
Medical Advisory Council (MAC)

The Forum MAC has developed a series of QAPI toolkits to assist dialysis facilities in meeting the requirements of the Conditions for Coverage.

INTRODUCTION EXCERPT

The goal of this toolkit is to suggest quality improvement approaches that a facility can use to ensure care coordination for patients.

As you are aware, the recently revised Conditions of Coverage for dialysis facilities mandates ongoing QAPI projects within each facility, and places responsibility for the direction of these projects upon the Medical Director. The purpose of the attached documents is to provide a ready-made toolkit for the initiation and documentation of QAPI projects, with the goal of increasing immunization rates for influenza, pneumococcal disease, and hepatitis B among dialysis patients.
